 This stunning car is one of only 44 that would be built. Today, only six are known to survive. When I purchased this car in 2013 it had begun to show its age. I commissioned a full ground-up restoration. I discovered the serial number codes on the engine firewall plate revealed the original color to be Pelham Gray, so I brought it back to its original color. It's V-8, 346 cu. in. 140 horse-power engine and a long wheel base make this car a dream to drive.

Originally a California car, I found this car in the classified section listed as a parts car. Four guys carried it into my garage. I completely restored this myself with a 355 engine, 700r transmission, weld racing wheels and four point roll cage. Eight years and about \$14,000 later, I now have the car I have always wanted.

OHIO

Abby Petit • NAC Products, Inc • Akron, OH

I was given this car by my Grandma, Linda Duve, wife of the founder of NAC Tom Duve. I drove this car from Florida to Ohio with my Dad and sister Ella. What an amazing trip! "Burt the Beamer" is fun to drive and I already have amazing memories driving around with family and friends. I'm very thankful to my Grandparents and I will cherish this car forever.

 When I was a kid, my parents had an old Pontiac convertible but it had a bad top and just sat in the yard. The one thing that always stuck in my mind about that car was the "sad" taillights that were turned down and looked like the car was frowning. Only the 1967-68 Pontiac Bonneville, Catalina and Venetra had those lights. It was my dream car for 25 years and I finally found one, white with black, and I acquired it two years ago from a gentleman in Florida who had restored the vehicle.

 In 2016 I traded two restored Ferrari's for this early Ferrari race car. After one year in Italy, the car was sold to the Argentine National Champion and raced for two years. More than 15 people have owned this car and I was attracted to it because aside from fresh paint and a couple of engine rebuilds, it is original to its 1952 specifications and has never been wrecked. I plan a modest restoration and showing it at various car shows.

I have always wanted a baby blue Mustang convertible but when I saw Delilah at my mechanics' shop, I knew she had to be mine. She was completely restored over about 8 years with a few additions like automatic transmission from a four-speed, a/c, a larger radiator and the engine went from the factory v-6 to a 302 from a Lincoln Town Car. I named her Delilah because sometimes she can be a real Bi--- but most of the time she is good. I absolutely love driving her – turns a lot of heads.

WISCONSIN

Kevin Twohig • Twohig Flooring America • Fond du Lac, WI

This car was always my favorite going back to high school, but I never thought I could get one. I must've looked at 100 cars of all colors before I found this one. It is fully optioned with a 327/365 hp. The local Corvette club helped me find a body shop to restore the exterior and some friends from the club helped with the interior. It's been featured in some GM showrooms and just turned 70,000 miles. My 15 year-old son is proficient at driving the four speed transmission and I will be hiding the keys when he gets his permit.

Moisture Lock® 101 - A water based hardener and sealer that seals the pores and capillaries in concrete substrates.

MICHIGAN
 Paul Bronikowski • PJB Sales • Clarkston, MI
 I have always wanted one of these cars and I found it in Michigan in 2004. Fortunately it has spent most of its time in California so it had no body issues. This was one of the last Ferrari's made with a carburetor. This car accelerates and corners incredibly well for a 3.0 liter. Every time I think about selling the car, I take it out for a drive and in about 100 feet I say to myself no way!

 I bought this truck because sometimes you just need a truck! I can't leave anything alone and in last five years I've done all of the work in my two car garage including an LS engine swap, air ride suspension, tons of body work and Plasti-Dip peelable auto paint. I'll still use the truck to haul a load of gravel, but my favorite thing to do is take my boys on a cruise with my friends in the Upstate SC GM Truck Club. I hope to teach my boys to work on vehicles and maybe one day they will like it the way I do.

the heart of it all!
 Tom Duve • NAC Products, Inc • Stow, OH
 From Detroit, this hand-built gen.4 Viper sports an 8.4 liter, 600 hp., 560lbft., V-10 motor. It is capable of 0-60 in less than four seconds and a top speed of over 200 mph. The Viper is destined to be one of the last true drivers sports cars as it transfers its power via a manual 6-speed transmission (no paddle shifter) and without electronic assists. Chrysler stopped production of the Viper in 2017.

I started riding dirt bikes at the age of 14, but I could not afford a new one until I turned 21 and I bought a brand new 1978 Bultaco mk11 250 Pursang. The 78 Bultaco was very innovative for its time. It had laid down rear suspension and long travel front forks for the first time in production. The bike had acceptable power and brakes and unreal handling on the motocross courses around So. Cal. I found this completely restored motorcycle about seven years ago and just had to add it to my collection.
