“A motorsport icon, the Carrera RS is considered by many to be the greatest 911 of all time. Chassis number 1526 is one of the last 500 RS's built and this car was ordered to M-472 Touring specification. This RS has its original sheet metal, original matching numbers engine and original matching numbers transmission. The color was the most popular single color of the production run, Light Yellow, Number 6262 and has Green Carrera and RS Graphics. A truly iconic car from 1973.”

Joe Salvo Miracle Sealants, Inc. (Retired) • Newport Beach, CA

“My Father served in the 83rd Infantry Division in World War II and after the war he used to race cars at the local track. I was looking for something we could work on together and I came across this Jeep. It was a labor of love for us. It took a year, but he did a lot of the research to find the parts and pieces. It took another five years for me to restore, but it is complete with all of the correct markings from one of the Jeeps from his unit.”

**SHELBY COBRA**

"A client of mine had used this as a prop to stage high end homes. When he decided to put it up for sale in 2018, I couldn't resist. This fiberglass frame off restoration is fitted with a 550HP 427R Roush motor blasting through its side pipes. So, if you don't happen to see it, you will definitely hear it. A tribute to Carroll Shelby and to the 1960's which is hands down the greatest decade in automotive history."

Sean Karagoz INSTOCK • N. Hollywood, CA

 If it's not SAM®, it's not sound control

"In early 2016 I found this A100 for sale at an auto repair shop and I had plans for it. I liked the character of the original paint, so we didn't repaint it. My buddy, Tim Guy, put in a fuel-injected 318 motor for me. I installed three kinds of tile in the back interior and a TV that we use to show slides of work we've done. Now we can take it to home shows or to car shows."

“This 1970 Corvette was sitting in a South Jersey warehouse in 1985 when I purchased it from the original owner. After a small delay of raising three boys (25 years), the actual restorations started with a complete motor rebuild, undercarriage and body work and original GM paint. It’s about 80% complete and I’d like to give a special thanks to David deBear from NAC for his overall assistance, especially with the engine rebuild.”

"I had a lot of parts leftover after building a 1932 Ford Roadster and I was watching the movie "American Graffiti" and thought it would be cool to build a 1932 Ford 5-window coupe. This is a scratch build from frame up and it's very close to the car in the movie. Every detail is the same except for the movie car had a steal body and this one is fiberglass. This car attracts so much attention both driving and at shows. The first show I took it to it won a trophy for its class. The car has way too much power being so light weight. This will be a keeper for sure."

Paul Bronikowski PJB Sales • Clarkston, MI

Strip application for crack protection

"I acquired this car two years ago through my father-in-law. I caught the bug from him many years ago, going to car shows and spending time at his car club "Raymond's Hot Rod Garage" in Belleville, NJ. This car interested me because it is from the year I was born and most of the renovation had been done by the previous owner. It's been in many shows and won trophies over the years, but one of the unique options it has is a tilt steering wheel which would have been a special-order option at that time. With a 327 automatic transmission and A/C, it's a user-friendly car for weekend enjoyment. It's like driving a wooden roller coaster!"

Joe Petti Wilkstone LLC • Paterson, NJ

Hardener and Sealer for MVT Protection

"About 10 years ago, I was heading home from Columbus and ran into a friend who asked if I was still looking for a Fastback. I stopped to look, and it only had 43,000 miles so I bought it and had it shipped to my home the next week. It sat for 25 years and needed a complete restoration. It took me 3 years, 3 months and three days to complete the restoration. It took 1st place at the ALL FORD NATIONALS 2020, in Carlisle, PA."

"My father Charles is a Korean War veteran and retired minister and he describes the restoration of this car as a "Family Project." My mother Phyllis and brother Greg, along with aunts, uncles, cousins and a great nephew all contributed to this project. This is a true "Family" vehicle that took over two years to complete. Hopefully one day I can con Daddy into letting me drive it!"

isolation protection

"This is one of approximately 4000 made special order that year. She has spent her entire life in Unicoi County, Tennessee, where she sat in a shed for about 13 years prior to me purchasing her from the estate of the original owner about 5 years ago. She is not perfect but a fun driver with original paint, original top and original untouched 383 2bl with automatic. I feel lucky to have found her and put her back on the road."

"I am the second owner of this Ferrari, purchasing it in February of 2012. One of only 378 examples built for North America. This configuration of Rosso Red Exterior, Stripe, Red/Black Interior, Radio, Fire Extinguisher and Red Brake Calipers makes it one of 14 cars in North America. It remains completely original and was a Coppa Di Platino award winner at the Concorso Ferrari in April 2018 in Old Town Pasadena."

For surfaces that require impact and airborne sound reduction

"I had a 1974 Cougar XR7, brown on brown with all the bells and whistles back in high school in 1980. Sold it just because I became tired of it and have regretted it ever since. Although they were very popular in the day, they have become very rare survivors. I told my wife if I ever saw one come up for sale I would buy it. Well at the beginning of this year I found this car from Pensacola, Florida. I guess I'm reliving my youth."
